What's New In?

FreeSchool is a software for schools, which allows to manage curriculums, communications, forms, school timetables and more. FreeSchool is a modular utility software. When installed on a public or private server, it employs conventional web interfaces to provide various services to every school component (students, teachers, school administrative-technical-auxiliary staff). You don't even need to have any knowledge of information technology. The interfaces are easy to use, both when consulting and updating the database. FreeSchool consists in a valuable alternative to finite commercial options. To those schools which are unable to develop or evaluate the different choices on the market, FreeSchool offers a homogeneous public solution. It proposes the introduction of new functions or the implementation of the existing ones, according to the needs. FreeSchool Description: FreeSchool is a software for schools, which allows to manage curriculums, communications, forms, school timetables and more. FreeSchool is a modular utility software. When installed on a public or private server, it employs conventional web interfaces to provide various services to every school component (students, teachers, school administrative-technical-auxiliary staff). You don't even need to have any knowledge of information technology. The interfaces are easy to use, both when consulting and updating the database. FreeSchool consists in a valuable alternative to finite commercial options. To those schools which are unable to develop or evaluate the different choices on the market, FreeSchool offers a homogeneous public solution. It proposes the introduction of new functions or the implementation of the existing ones, according to the needs. Ease of Use - Mac and Windows, does not require Macintosh or Windows software, as the program is downloaded and installed in the server operating in a privileged location, making it accessible with any user account on the computer. User-Friendly - The program of school management is easy to use and very intuitive for the novice, with which you can assume the role of an assistant of teachers and students. FreeSchool User Interface - From a common interface for study materials, lessons, learning objectives, certificates, surveys, in a single command to perform all these operations. FreeSchool is a software for schools, which allows to manage curriculums, communications, forms, school timetables and more. FreeSchool is a modular utility software. When installed on a public or private server, it employs conventional web interfaces to provide various services to every school component (students, teachers, school administrative-technical-auxiliary staff
