Robusta File Shredder (Final 2022)

The Robusta File Shredder is an effective and secure solution when you want to ensure your data is not recoverable by third-party software. You can easily shred one or more files or folders and either use a password or choose a secure file shredder algorithm (Gutmann, British HMG, etc.). To erase the data, you need to simply right-click the file and choose to shred it. All in all, it's a free application that integrates into Windows Explorer's context menu so you can shred confidential files and folders without having to install any additional tools or configure registry settings. The software uses the file shredder algorithms provided by Microsoft, so any important information stored on your disk will be unrecoverable by all but the most advanced file recovery software. Note that you will still need to pay for the data recovery service if you want to recover the data later. This solution is perfect for: Securely erasing important documents and folders. Then follow this tutorial Q: What to do when you run into an accepted answer Question: This question is based on a recent question I asked How can I ask about a method that is flawed and should be changed? I found a question from the same community that had a perfectly suitable, accepted answer (from a community member who has since moved on). I did not find the post when it was originally asked, and as the accepted answer provided a reasonably clear process for contacting the maintainer. I really did not have any idea that the question was answered at the time I posted my original question. I voted to close the question as off-topic, and added my own answer with "I should have searched better" as the "other answers" section. In retrospect I wish I had also edited the question to be more clear, but I chose to not edit the question as it was in a "nominate for closure" state, so I would not have been able to roll back. Now that I have discovered the question, how should I have dealt with it? Should I have just left it alone, since I don't think it is worth bumping
