There are two options: Step 3: Download these extensions and the other option is to check the box next to the extension so that Blender loads it automatically every time. Step 4: Go to File > Preferences > addons > and search for cube-js-panorama-rift. Step 5: Click the download button. Step 6: If you did everything right, then a new folder called "cubejs" will be created in your Blender folder. Go to File > Preferences > addons > Add Files... and browse to the folder you just created. You should see the files and folders within the cubejs folder. Step 7: Now copy the files and folders in the cubejs folder and go to File > User Preferences > Addons and paste them in. Step 8: Save and close. Step 9: Now start Blender and go to File > User Preferences > view. Step 10: Here we can choose the view we want to use. In our case, we want to see a 3D view. The game will now look like this.
